

AMPIOS

BUILDING VALUABLE BUSINESSES

*Entrepreneur Bespoke* – A Full Strategic Growth Journey

## What is *Entrepreneur Bespoke*?

- An affordable, focused and bespoke to your business programme for growth delivered by experts, with dedication, professionalism and integrity
- For those wanting another level for their business or building for exit
- Built around four key areas

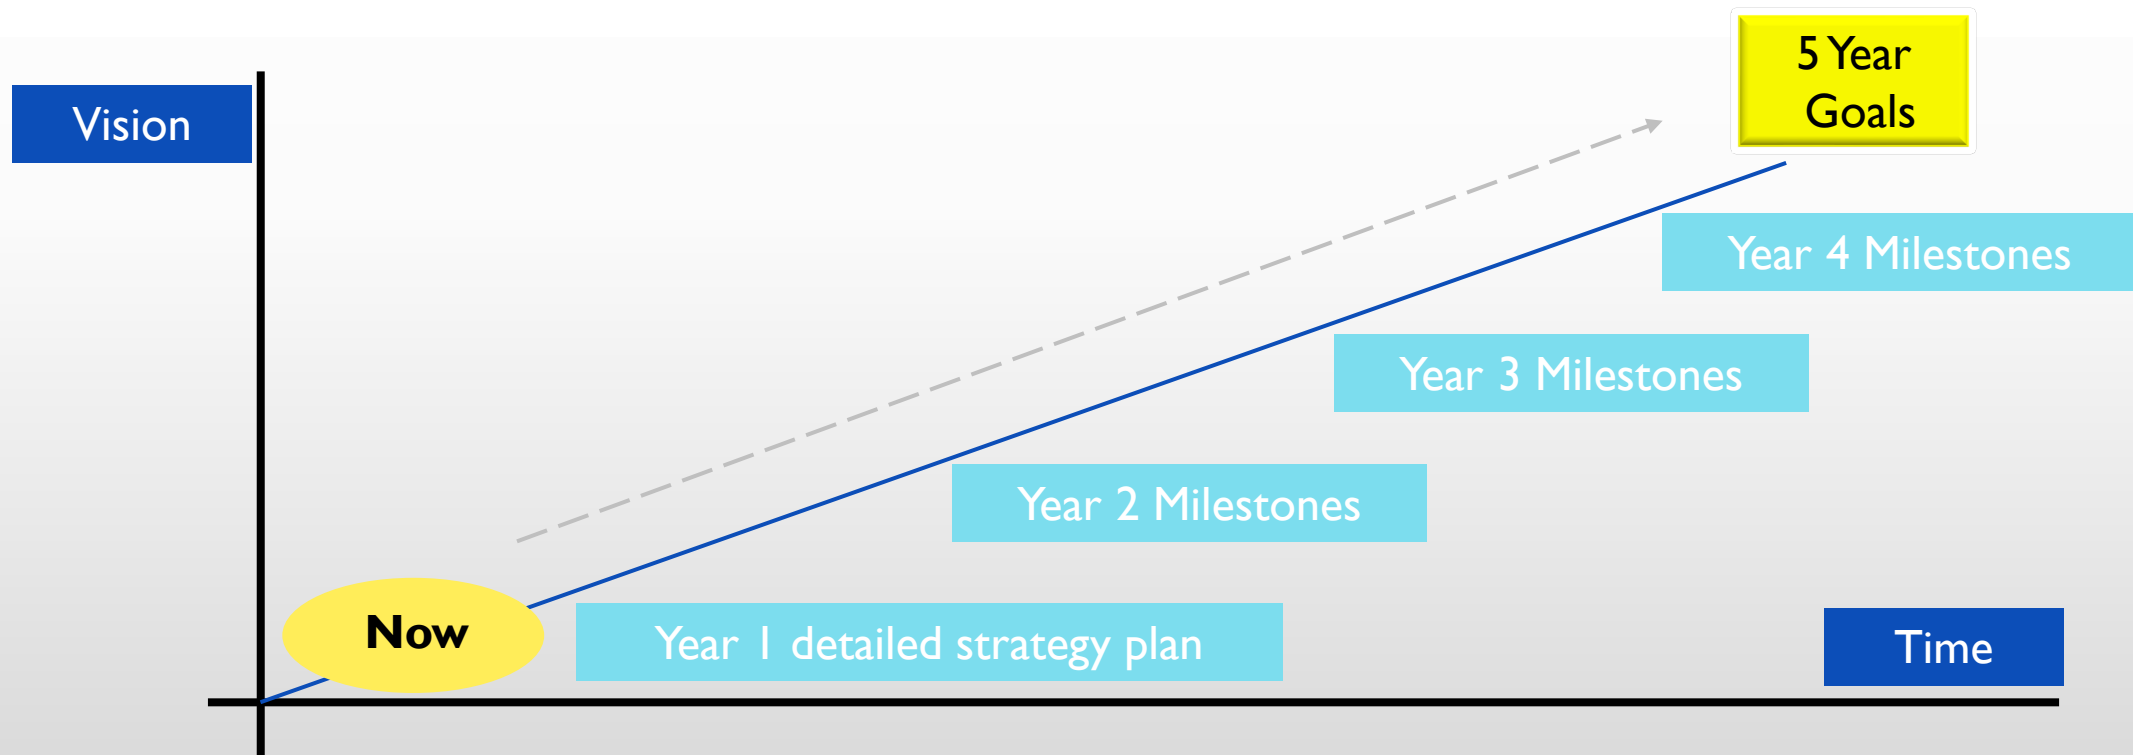

## How does *Entrepreneur Bespoke* work?

### The Destination (strategic vision)

Our experts:

- Listen to understand where a business wants to get to;
- Review the business, its market, management, operations, systems and people
- Engage to see all shareholders are aligned to the same vision; and
- If there's any uncertainty in vision, clarify it, so it's ambitious but achievable

## The Journey - Now the destination is clear, it's time to plot the journey, the strategy

## How we bridge the business advice gap

Businesses are made up of a number of inter-connected parts that need to work in harmony to achieve real success – our team of experts understands each of these elements. Entrepreneur Bespoke allows affordable access to those experts with cross-sector experience and resource to help:

- Construct effective strategy
- Carry out detailed planning bespoke to your business
- Raise any necessary funding
- Stay close to your management team to ensure implementation of planning
- Provide missing resource to keep plans moving
- Deliver strong, measurable growth

## Does It work?

**Absolutely – let’s contrast two (real) examples:**

### Company A invested in *Entrepreneur Bespoke* 5 years ago

- New strategy developed
- Funding of £12m raised
- New factory built to implement the new strategy
- Turnover up 220%
- Profitability up 145%
- Significant cash reserve built
- Shareholder value increased from £5.5m to £20.5m
- Huge return on fee investment

### Company B did not invest 5 years ago (to “save cost”)

- More of the same issues
- No real business strategy
- Turnover reduced by 9%
- Profitability now very marginal, at best
- Cash reserve virtually exhausted
- Now facing difficult trading conditions
- Starting to lose key employee skills
- The outlook is poor
